RI TRANSPARENCY REPORT

2020

Everwood Capital SGEIC SA

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2020 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

<input type="checkbox"/> Other, specify(2)	

SG 01.3

Indicate if the investment policy covers any of the following

- Your organisation's definition of ESG and/or responsible investment and it's relation to investments
- Your investment objectives that take ESG factors/real economy influence into account
- Time horizon of your investment
- Governance structure of organisational ESG responsibilities
- ESG incorporation approaches
- Active ownership approaches
- Reporting
- Climate change
- Understanding and incorporating client / beneficiary sustainability preferences
- Other RI considerations, specify (1)
- Other RI considerations, specify (2)

SG 01.4

Describe your organisation's investment principles and overall investment strategy, interpretation of fiduciary (or equivalent) duties, and how they consider ESG factors and real economy impact.

Everwood Capital SGEIC SA is a fund management company mainly focused on investments in renewables, special situations, and real estate, with the aim to create value through responsible investments.

We are currently focused on raising and investing our new fund with a size target of €300 million in order to develop a 1.000 MW portfolio of solar PV and wind energy within the next seven years. The main impact objective of this fund is to develop a portfolio of long term sustainable clean energy with as lowest environmental impact as possible. Additionally, the secondary objectives are to incentivize the knowledge and adoption of solar energy in Southern Europe and to prove that investing and sustainability are complementary goals.

SG 01.5

Provide a brief description of the key elements, any variations or exceptions to your investment policy that covers your responsible investment approach. [Optional]

The Investment Policy: The Investment Case and Main Investment Criteria

As all Everwood vehicles are regulated under the National Securities Market Commission (CNMV) (body responsible for the supervision and inspection of Spanish securities markets and the activity of all those involved in them), the investment policy must be defined and applicable since the incorporation of the fund:

- Investment Case: The main strategy is to invest on photovoltaic projects, generally from 20MW up to 300MW, that already have a technical project and the license to start construction of the plant ("ready to build"). The initial purchase of the license and permits will be exclusively finance with equity while the construction will be partially finance through project finance from an external bank.
- Nº Total Investments per fund: 15-25
- Expected investment & holding period: 3 years investment period + 4 years holding period with exit by year 7.

Investment Governance Process: ¿How does the organization ensure that investments meet the investment criteria?

Firstly, the investment team provides a first filter, ensuring that the investment meets the criteria of the Fund strategy (size, sector, technical viability, etc).

Secondly, the Investment Committee discuss the terms and characteristics of the investment to ensure it meets the criteria of the fund, and only if this is the case the investment is approved.

Investment Policy: ESG Impact:

An exclusively solar energy strategy is the perfect example of how financial performance and ESG principles can be complementary goals:

We are currently at an inflection point in the way infrastructure/energy investors look at renewable energy. Traditionally renewable energy has been a niche strategy for infrastructure/energy investors. Today renewable energy has become mainstream with a clear focus on wind in Northern Europe and Solar in Southern Europe. This is happening now for the following reasons:

- Grid parity: with the strong reduction in capex costs (down from c. €8 million/MW in 2006 to less than €800k/MW in 2019) cost effectiveness of solar PV in countries with high solar irradiation is now a reality. In fact, it is now the most competitive technology to generate electricity in areas of high solar irradiation.
- Energy transition: there is increasing social awareness regarding climate change. This, combined with the fact that traditional energy technologies (coal and nuclear) are, in many cases, reaching the end of their useful life, is triggering huge investments in the renewable industry.

Therefore, our investment strategy has managed to fit perfectly investors both objectives of achieving a compelling return on their investment, as well as comply with the investor impact preferences.

No

SG 01 CC	Mandatory to Report Voluntary to Disclose	Public	Descriptive	General
----------	---	--------	-------------	---------

SG 01.6 CC Indicate whether your organisation has identified transition and physical climate-related risks and opportunities and factored this into the investment strategies and products, within the organisation's investment time horizon.

Yes

Describe the identified transition and physical climate-related risks and opportunities and how they have been factored into the investment strategies/products.

The energy transition is a reality in Europe, and all countries are focusing their economic and policy efforts on this goal. Spain has a unique set of conditions that creates a great opportunity to develop the renewable energy sector, allowing to achieve both sustainability and profitability in our investments.

No

SG 01.7 CC Indicate whether the organisation has assessed the likelihood and impact of these climate risks?

Yes

Describe the associated timescales linked to these risks and opportunities.

As an example, Spain is expected to close all its coal and nuclear plants which represent c.38% of total electricity generation between now and 2035. This is expected to be replaced mostly by solar PV. Also, the European Union has set mandatory targets of 32% of renewable energy penetration in gross final energy use by 2030 (42% for 2035), which Spain has increased for itself to 35%; although not officially passed by parliament yet, in late February 2019 the government expressed its commitment to reach 42% as part of the Energy Transition Package.

No

SG 01.8 CC Indicate whether the organisation publicly supports the TCFD?

Yes

No

SG 01.9 CC Indicate whether there is an organisation-wide strategy in place to identify and manage material climate-related risks and opportunities.

Yes

Describe

There is a clear direct relationship between the future of the renewable energy sector and climate change related risk-opportunities. Therefore, due to the nature of our investment strategy, it is vital for our organization to identify and anticipate climate-related tendencies, both from a macro perspective (country-by-country policies, European objectives, international agreements) as well as micro tendencies (technological advances, economic efficiency, industry data, etc).

Therefore, our team combines top financial skills coming from partners that have led energy & power sector/regional teams in market leading institutions with top technical and environmental skills coming from operating partners

No

SG 1.10 CC Indicate the documents and/or communications the organisation uses to publish TCFD disclosures.

- Public PRI Climate Transparency Report
- Annual financial filings
- Regular client reporting
- Member communications
- Other
- We currently do not publish TCFD disclosures

Confidence building measures

CM1 01	Mandatory	Public	Additional Assessed	General
--------	-----------	--------	---------------------	---------

CM1 01.1 Indicate whether the reported information you have provided for your PRI Transparency Report this year has undergone:

- Third party assurance over selected responses from this year's PRI Transparency Report
- Third party assurance over data points from other sources that have subsequently been used in your PRI responses this year
- Third party assurance or audit of the correct implementation of RI processes (that have been reported to the PRI this year)
- Internal audit of the correct implementation of RI processes and/or accuracy of RI data (that have been reported to the PRI this year)
- Internal verification of responses before submission to the PRI (e.g. by the CEO or the board)
 - Whole PRI Transparency Report has been internally verified
 - Selected data has been internally verified
- Other, specify
- None of the above

CM1 02	Mandatory	Public	Descriptive	General
--------	-----------	--------	-------------	---------

CM1 02.1 We undertook third party assurance on last year's PRI Transparency Report

- Whole PRI Transparency Report was assured last year
- Selected data was assured in last year's PRI Transparency Report
- We did not assure last year's PRI Transparency report
- None of the above, we were in our preparation year and did not report last year.

CM1 03	Mandatory	Public	Descriptive	General
--------	-----------	--------	-------------	---------

CM1 03.1 We undertake confidence building measures that are unspecific to the data contained in our PRI Transparency Report:

- We adhere to an RI certification or labelling scheme
- We carry out independent/third party assurance over a whole public report (such as a sustainability report) extracts of which are included in this year's PRI Transparency Report
- ESG audit of holdings
- Other, specify
- None of the above

CM1 04	Mandatory	Public	Descriptive	General
--------	-----------	--------	-------------	---------

CM1 04.1

Do you plan to conduct third party assurance of this year's PRI Transparency report?

- Whole PRI Transparency Report will be assured
- Selected data will be assured
- We do not plan to assure this year's PRI Transparency report

CM1 07

Mandatory

Public

Descriptive

General

CM1 07.1

Indicate who has reviewed/verified internally the whole - or selected data of the - PRI Transparency Report . and if this applies to selected data please specify what data was reviewed

Who has conducted the verification

- CEO or other Chief-Level staff
- The Board
- Investment Committee
- Compliance Function
- RI/ESG Team
- Investment Teams
- Legal Department
- Other (specify)
